ABOUT THE COMPANY

IC Solution (ICS) is a digital service provider that aims to provide software, designing and marketing solutions to individuals and businesses. At ICS, we believe that service and quality is the key to success

We provide all kinds of technological and designing solutions from Billing Software to Web Designs or any custom demand that you may have. Experience the service like none other!

Some of our services include:

Development - We develop responsive, functional and super-fast websites.

We keep User Experience in mind while creating websites. A website should load quickly and should be accessible even on a small view-port and slow internet connection.

Mobile Application - We offer a wide range of professional Android, iOS & Hybrid app development services for our global clients, from a start up to a large enterprise.

Design - We offer professional Graphic design, Brochure design & Logo design. We are experts in crafting visual content to convey the right message to the customers.

Consultancy - We are here to provide you with expert advice on your design and development requirement.

Videos - We create a polished professional video that impresses your audience.

OVERVIEW OF THE PROJECT

Project Name: Tribute to DOCTORS

Team Members: D Hareesh

Revati Rajkumar Naik

This project is based on Web Development And its Applications. The main objective of this project is to learn the implementation of HTML, CSS and JavaScript. The basic webpage of this project is created using HTML and styling of the webpage is done using CSS.

This webpage is about tribute to doctors who lost their lives in covid-19 second wave

On the crisis of covid-19 which effected many nations including india , infections Across the country spread rapidly on march 2021 , everyone fighting for their lives from this pandemic , the doctors are the only hope everyone are in . They stood up for the entire nation to battle against covid even though they know the risk of infection Still many doctors gave their priority to battle against covid , many doctors lost their Lives while serving the patients , some are even youngsters and some are pregnant. In order to greet the doctors who lost their lives in this pandemic , this is the website that gives a tribute to all the doctors and healthcare workers who worked hard to tackle the novel corona virus.

ABOUT DOCTORS

A doctor is someone who is qualified in medicine and treats people who are ill. Do not discontinue the treatment without consulting your doctor. Doctor Paige will be here right after lunch to see her. A dentist or , veterinarian can also be called doctor.

In order to fight against deadly virus COVID-19 , Nearly 800 doctors have lost their lives while serving for patients . even though Doctors knew about the situation of getting infected with covid , still many doctors came forward to help patients.

Doctors and other healthcare staff have been battling on the front lines in tough situations. In the battle against covid-19 for over a year now , The covid-19 pandemic is a stark remainder of the vital role doctor's play. since the pandemic began , they have been working in long shifts, they go through hardships and struggles on a daily basis.This has taken a heavy toll on their physical and mental well-being ,They have to wear masks constantly for hours

Still , they ensure that india does not succumb to the challenges posed by covid-19. Either through dancing or lightening up the mood, They did whatever they could in keeping india strong against the pandemic.**They truly deserve all of our respect and gratitude.**

How covid has affected doctors

Amidst the prevalence of the Covid-19 pandemic, the Indian Medical Association on Tuesday said that **798** doctors died during the second wave of Covid-19 across the country of which maximum 128 doctors lost their lives in Delhi, followed by Bihar at 115 and Uttar Pradesh at 79.

Like several parts of the world, especially Europe, India has been experiencing a massive surge of COVID-19 cases and deaths. As of April 10, 2021, India is the 3rd leading country based on the USA and Brazil's identified cases. Since the middle of March 2021, the second wave has started, and on April 09, the highest number of cases (144,829) has been identified in India. The major affected states are Maharashtra, Kerala, Karnataka, Andhra Pradesh, Tamil Nadu, Andhra Pradesh, Delhi, Uttar Pradesh, and West Bengal. Despite this high caseload, several national movements such as the farmers' movement, election in several states have been going on. Those can increase the risk of transmission of COVID-19.

States like Maharashtra and Kerala where the prevalence of the Delta Plus variant of Covid-19 is on a rise also reported deaths of doctors in double digits. Maharashtra reported 24 deaths.

Like every year, the country celebrated National Doctors' Day on July 1 to honour the contribution of the doctor. The first National Doctor's day was celebrated in the country in July 1991

PM Modi ensured that doctors should be respected, protect and safeguard. He also emphasized the need for vaccination. We're celebrating this year's National Doctors' Day (July 1) in remembrance of the veteran Dr BC Roy. We're so much pleased that PM Modi greeted the medical fraternity for the Doctors' Day, the IMA President had said.

TOOLS USED

Software Requirements

- Visual Studio Code 2019.
- Google Chrome or Microsoft Edge of latest version.
- Front End: HTML, CSS
- Windows XP/7/8/10 OS

Hardware Requirements

- Pentium 200-MHz computer with a minimum of 64 MB of RAM (128 MB of RAM recommended).
- Monitor with a refresh rate of at least 40Hz for a smooth GUI experience (optional).

COVID Warriors

Second wave hits india

Like several parts of the world, especially Europe, India has been experiencing a massive surge of COVID-19 cases and deaths. As of April 10, 2021, India is the 3rd leading country based on the USA and Brazil's identified cases. Since the middle of March 2021, the second wave has started, and on April 09, the highest number of cases (144,829) has been identified in India. The major affected states are Maharashtra, Kerala, Karnataka, Andhra Pradesh, Tamil Nadu, Andhra Pradesh, Delhi, Uttar Pradesh, and West Bengal. Despite this high caseload, several national movements such as the farmers' movement, election in several states have been going on. Those can increase the risk of transmission of COVID-19.

With more than 300,000 new cases confirmed as on 30 april 2021, the second wave of COVID-19 in India has been devastating. The country faces extreme shortages of hospital beds, oxygen supplies, life support equipment, and medicines. [click here to know more about covid-19 second wave](#)

How covid 2nd wave has affected doctors ?

Amidst the prevalence of the Covid-19 pandemic, the Indian Medical Association on Tuesday said that **798** doctors died during the second wave of Covid-19 across the country of which maximum 128 doctors lost their lives in Delhi, followed by Bihar at 115 and Uttar Pradesh at 79.

States like Maharashtra and Kerala where the prevalence of the Delta Plus variant of Covid-19 is on a rise also reported deaths of doctors in double digits. Maharashtra reported 24 deaths.

Like every year, the country celebrated National Doctors' Day on July 1 to honour the contribution of the doctor. The first National Doctor's day was celebrated in the country in July 1991

"PM Modi ensured that doctors should be respected, protect and safeguard. He also emphasized the need for vaccination. We're celebrating this year's National Doctors' Day (July 1) in remembrance of the veteran Dr BC Roy. We're so much pleased that PM Modi greeted the medical fraternity for the Doctors' Day," the IMA President had said.

A Tribute

In order to fight against deadly virus COVID-19 , Nearly 800 doctors have lost their lives while serving for patients . even though Doctors knew about the situation of getting infected with covid , still many doctors came forward to help patients.

Doctors and other healthcare staff have been battling on the front lines in tough situations. In the battle against covid-19 for over a year now , The covid-19 pandemic is a stark reminder of the vital role doctor's play. since the pandemic began , they have been working in long shifts, they go through hardships and struggles on a daily basis. This has taken a heavy toll on their physical and mental well-being ,They have to wear masks constantly for hours. Still , they ensure that india does not succumb to the challenges posed by covid-19. Either through dancing or lightening up the mood, They did whatever they could in keeping india strong against the pandemic. They truly deserve all of our respect and gratitude.

Here are some Doctors who fought for patients during pandemic and lost their lives :

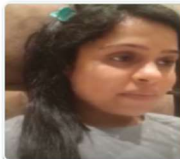

Dr Joginder Chaudhary

A 27-year-old doctor in Delhi, who was on the frontline in the fight against the novel coronavirus, died on Saturday night after a month-long battle against the highly infectious disease. Dr Joginder Chaudhary worked at Dr Baba Saheb Ambedkar Hospital. He had tested positive for COVID-19 on June 27

Kandikatla Roji

A bright young doctor, Kandikatla Roji, who was serving COVID patients at Ashram Hospital Eluru here, herself succumbed to the coronavirus on Tuesday. K Roji had completed MBBS with first-class marks and was working as a house surgeon at Ashram Hospital in Eluru city of West Godavari district.

Dimple Arora Chawla

a dentist was seven months pregnant with her second child when she tested positive for coronavirus in April. Two weeks later, the 34-year-old lost her unborn baby. The next day, the doctor too lost her battle to the virus. She leaves behind her three-year-old son and her husband.

Dr Pratiksha

The Pregnant COVID-19 Martyr: Dr Pratiksha Waldekar Gawai was a 33-year-old pathologist and was 7 months pregnant working in Amravati's Irwin Government Hospital. In spite of herself being pregnant, she didn't refuse the duty of SARI wards or suspected corona patients.

Dr Anas Mujahid

A 26-year-old resident of north-east Delhi's Bhagirathi Vihar working as doctor at Guru Tegh Bahadur Hospital, who converted into a designated Covid-19 hospital, died within hours of testing positive for the infection on Sunday, confirmed officials from the hospital administration.

COVID-19

THE ABOVE DATA SHOWN IS TAKEN FROM THE GOVERNMENT OFFICIAL WEBSITE AS ON 28TH SEPTEMBER 2021

Implications of the second wave of COVID-19 in India

The second wave of COVID-19 in India has had severe consequences in the form of spiralling cases, reduced supplies of essential treatments, and increased deaths particularly in the young population. Understanding why the second wave has been more dangerous than the first could help to identify the potential areas of diagnostics to target with future control strategies

Symptoms

COVID-19 affects different people in different ways. Most infected people will develop mild to moderate illness and recover without hospitalization.

Most common symptoms:

- fever
- cough
- tiredness
- loss of taste or smell

Less common symptoms:

- sore throat
- headache
- aches and pains
- diarrhoea
- a rash on skin, or discolouration of fingers or toes
- red or irritated eyes

Serious symptoms:

- difficulty breathing or shortness of breath
- loss of speech or mobility, or confusion
- chest pain

Precautions

Protect yourself and others around you by knowing the facts and taking appropriate precautions. Follow advice provided by your local health authority.

To prevent the spread of COVID-19:

- Maintain a safe distance from others (at least 1 metre), even if they don't appear to be sick.
- Wear a mask in public, especially indoors or when physical distancing is not possible.
- Choose open, well-ventilated spaces over closed ones. Open a window if indoors.
- Clean your hands often. Use soap and water, or an alcohol-based hand rub.
- Get vaccinated when it's your turn. Follow local guidance about vaccination.
- Cover your nose and mouth with your bent elbow or a tissue when you cough or sneeze.
- Stay home if you feel unwell.

If you have a fever, cough and difficulty breathing, seek medical attention. Call in advance so your healthcare provider can direct you to the right health facility. This protects you, and prevents the spread of viruses and other infections.

Masks

Properly fitted masks can help prevent the spread of the virus from the person wearing the mask to others. Masks alone do not protect against COVID-19, and should be combined with physical distancing and hand hygiene. Follow the advice provided by your local health authority.
